

Job vacancies in biological sciences:

(application deadline: July 8th 2013

job starts October 2013)

2 PhD students

are sought to take part in a project involving the role of inhibitors of serine proteases in regulation of neutrophil extracellular trap formation and autoimmunity.

Individuals with an experience in immunology and/or molecular or cell biology are encouraged to apply. A background in mouse studies, rheumatoid arthritis animal models, and/or molecular cloning are of particular interest.

PhD student must enroll in PhD program at Faculty of Biochemistry, Biophysics and Biotechnology of Jagiellonian University (next exam for PhD program will take place in late June/early July 2013)

Letters of application with CV, references and a summary of current research interest should be sent to Dr. Joanna Cichy at **Joanna.Cichy@uj.edu.pl**

Company/Institute

Jagiellonian University, Faculty of Biochemistry, Biophysics and Biotechnology, Dept. of Immunology

KRAKOW, POLAND
