

Analysis of veterinary drugs in food, feed and environmental samples

Lecturer: prof. Ramon Companyo (University of Barcelona, Spain)

Course description:

1. Safety issues concerning food safety (EU legislation and Codex Alimentarius)
2. Sample treatment (extraction, preconcentration and cleanup)
3. Separation and detection (with emphasis in mass spectrometry)
4. Screening and confirmatory methods
5. Multiresidue/multifamily methods
6. Targeted and untargeted analysis
7. Quality management in the field of food safety and laboratory accreditation
