

## Nanotechnology: The Good, the Bad and the Ugly

Lecturer: Professor Joseph N. Grima (University of Malta)

### Course description:

Over the past few years there have been some very important developments in the field of nanotechnology which have started to revolutionise various aspects of our daily lives. For example, although many may not realize, various products containing nanoparticles, such as sunscreens and cosmetics, are already on the market and being used by consumers worldwide. This set of lectures will look into both the good and less good aspects of nanotechnology, with special emphasis on nanotoxicology, that is the toxicity associated with nanoparticles.
