

ADVANCES IN MATERIALS SCIENCE

*following former ACTA TECHNICA GEDANENSIA
in specific field of Materials Science and Engineering*

Published by
Gdańsk Scientific Society

under the auspices of
Polish Materials Society

Volume 5

2005

Number 1-3 (6-8)

ISSN 1730-2439

Editor - in - Chief:

Andrzej Zieliński

Editorial Board:

- ***Advanced Materials***

J. Łabanowski (Editor)

- ***Environmental Degradation***

J. Ćwiek

- ***Surface Engineering***

W. Serbiński

Technical Editors:

M. Głowacka

K. Krzysztofowicz

B. Raczkowska

G. Wołoszyk

International Advisory Panel:

R. Akid, Great Britain

A. Barbacki, Poland

A. Czyrska-Filemonowicz, Poland

M. Danielewski, Poland

D. Desjardins, France

L.A. Dobrzański, Poland

A. Dziadoń, Poland

V. Goltsov, Ukraine

K. Haberko, Poland

H. Hanninen, Finland

H. Leda, Poland

E. Łunarska, Poland

B. Major, Poland

E.J. Mittemeijer, Germany

H. Morawiec, Poland

J. Nowacki, Poland

J.M. Olive, France

J. Onoro, Spain

A. Pomogailo, Russia

T. Wierchoń, Poland

Editorial Office: Advances in Materials Science, Department of Materials Science and Engineering, Gdańsk University of Technology, 11/12 Narutowicza, 80-952 Gdańsk, Poland. tel. (+48 58) 347 26 98, fax (+48 58) 347 18 15, e-mail: kim@jan.mech.pg.gda.pl

Advances in Materials Science publishes scientific and review papers on various aspects of materials science. The preferred topics include: environmental degradation, surface engineering and advanced materials. Both fundamental aspects of materials science and engineering, and application problems can be presented in the published papers. The periodical is open to researchers of all countries, both top experts as well as young scientists. All contributions should be written in English. Papers will be reviewed.

AMS is available at the website www.pg.gda.pl/mech/kim/ams every 3 months. All papers are printed in hard copy as Volume No 1 – 4 in the end of each year. The supplementary information, as instructions for authors, and full texts of recently printed papers are also available at the website.

CONTENTS

	Page
<i>Janusz Ćwiek</i> HYDROGEN DELAYED CRACKING OF HIGH-STRENGTH WELDABLE STEELS.....	5
<i>Jerzy Łabanowski</i> ASSESSMENT OF STRUCTURAL CHANGES AT IN-519 CAST STEEL REFORMER TUBES .	14
<i>Eugeniusz Ranatowski</i> REMARKS ON AN INVERSE MODELLING OF WELDING PROCESSES	21
<i>Andrzej Zieliński, Waldemar Serbiński</i> RELATION BETWEEN STEEL MICROSTRUCTURE AND ITS PROPERTIES IN INERT AND AGGRESSIVE ENVIRONMENTS	32
<i>Andrzej Drotlew, Bogdan Piekarski, Joanna Tuleja</i> WEAR AND TEAR OF CHARGE-CARRYING ELEMENTS IN CARBURISING FURNACE	41
<i>Jarosław Jakubowicz</i> MORPHOLOGY OF SILICON (111) DURING ELECTROCHEMICAL ETCHING IN NH ₄ F ELECTROLYTES	49
<i>Jerzy Łabanowski, Krzysztof Krzysztofowicz</i> THE INFLUENCE OF WELDING THERMAL CYCLES ON CORROSION RESISTANCE OF DUPLEX STAINLESS STEEL	55
<i>Maciej Ranatowski, Eugeniusz Ranatowski</i> ANALYSIS OF THE FRACTURING PROCESS OF NATURAL COMPOSITE ON EXAMPLE OF THE CORTICAL PART OF BONE	63
<i>Maciej Ranatowski, Eugeniusz Ranatowski</i> QUANTITATIVE EVALUATION OF THE FRACTURING PROCESS OF NATURAL COMPOSITE ON EXAMPLE OF THE CORTICAL PART OF BONE	69
<i>Małgorzata Suhecka, Andrzej Borisovich, Waldemar Serbiński</i> GREEN'S FUNCTION METHODS FOR MATHEMATICAL MODELING OF UNIDIRECTIONAL DIFFUSION PROCESS IN ISOTHERMAL METALS BONDING PROCESS.....	75
<i>Tadeusz Z. Woźniak</i> AUSTENITE DOUBLE DECOMPOSITION INTO BAINITE IN HIGH CARBON STEELS.....	80
